SKILLS

- Programming Languages:** C++, Python, JavaScript
- Cloud & DevOps:** AWS (EC2, EKS, S3), Azure, Docker, Kubernetes, CI/CD (GitHub Actions), Jenkins.
- Web Development:** HTML, CSS, Tailwind CSS, React.js, Node.js, Express.js, Rest APIs
- Databases:** MySQL, MongoDB.
- Tools:** Git, Linux CLI, Bash Scripting, GitHub, GitHub-Actions
- CS Fundamentals:** DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering
- Soft Skills:** Problem-Solving, Adaptability, Quick Learner

PROJECTS

Vendor & Purchase Order Manager — Enterprise SaaS Platform | [GitHub](#)

Oct'25 – Feb'26

- Developed a full-stack procurement platform for vendors, purchase orders, and inventory, reducing manual work by 70%.
- Built secure backend with JWT, 2FA, RBAC, and audit logging serving 50+ concurrent users with scalable access control.
- Designed analytics and anomaly detection systems with an architecture extendable to AI-driven predictive insights.
- Automated approval workflows with real-time notifications using Docker-based deployment, improving operational efficiency by 60%.

Tech stack: MERN (MongoDB, Express.js, React.js, Node.js), JWT, Socket.io, Docker, REST APIs, RBAC, 2FA

Automated Cloud-Native CI/CD Pipeline | [GitHub](#)

Oct'25 - Dec'25

- Built and deployed a containerised Node.js application on AWS ECS with Fargate, achieving 99.9% uptime and serverless scalability.
- Implemented CI/CD automation using GitHub Actions, reducing deployment time from 30 minutes to 3 minutes with automated testing.
- Configured container image management with Amazon ECR and monitored application logs using CloudWatch dashboards.
- Managed AWS infrastructure (ECS, ECR, IAM, CloudWatch) following security best practices and least-privilege access controls.

Tech stack: AWS EKS, Kubernetes, Docker, Helm, GitHub Actions.

Three-Tier MERN Application Deployment on Kubernetes | [Github](#)

April'26 - present

- Containerised **3 microservices** (React frontend, Node.js backend, MongoDB database) using Docker, building separate images for each tier and pushing them to a container registry for Kubernetes deployment.
- Created Kubernetes manifests for Deployments, Services, and Pods, enabling seamless communication between frontend, backend, and database layers.
- Improved application availability and deployment consistency through container orchestration and automated pod management.
- Managed service exposure, scaling, and microservice connectivity while troubleshooting issues like CrashLoopBackOff and port misconfigurations.

Tech stack: React.js, Node.js, MongoDB, Docker, Kubernetes, Helm, GitHub, Linux, YAML.

TRAINING

AWS CLOUD COMPUTING TRAINING, AWS

Feb'25 – April'25

- Completed AWS Cloud Computing training with hands-on exposure to core services, including compute, storage, databases, networking, and cloud architecture fundamentals
- Gained hands-on experience designing scalable cloud architectures and serverless workflows using core AWS services.

CERTIFICATES

- Oracle Cloud Infrastructure Certified AI Foundations Associate | [Oracle](#) Feb'26
- Oracle Cloud Infrastructure Certified Foundations Associate | [Oracle](#) Feb'26
- AWS Certified Solutions Architect – Associate (SAA-C03) | [Amazon Web Services](#) April'26

ACHIEVEMENTS

- Practised 300+ problems on LeetCode, GeeksForGeeks, and achieved a 2-star rating in contests. Apr'26
- Serving as the Vice-President of the Changemakers of Amazon, LPU. Oct'25- Present

EDUCATION

Lovely Professional University,

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.59**

Phagwara, Punjab

Aug'23 - Present

Noble Public School,

Intermediate; **Percentage: 7.46%**

Satna, M.P

un'21 – Apr'22

Noble Public School,

Matriculation; **Percentage: 84%**

Satna, M.P

Jun'19 - Apr'20
